Abstract (en)

[origin: WO2004075702A1] The invention relates to a device for preparing mixed beverages, comprising a mixing chamber (6) that is located in a housing (1) and has a fill opening (7) in its upper region and at least one extract container (8, 8') for holding a pulverulent soluble extract that is located above said fill opening (7). The device is also equipped with a dosing device of the extract container (8, 8'), which supplies the pulverulent soluble extract via a dosing opening to the mixing chamber (6), where the extract supplied by the dosing device can be mixed with, in particular, a hot liquid. The device is additionally equipped with a supply opening (9), via which an additional pulverulent soluble extract can be manually supplied to the mixing chamber (6).
