Abstract (en)

[origin: WO2004067396A1] The invention relates to a packaging method and a packaging structure or a packaging set, particularly for plate-shaped materials. The invention particularly relates a packaging method and a packaging set, and especially a plug-in connection-type packaging set which can be specifically arranged around plate-shaped materials of different sizes while acting as a shock absorber, spacer, anti-skid device, and static stabilizing device. The packaging structure also comprises a base plate and a cover of a transport container which is designed so as to match the unconventional interior packaging set while fitting on conventional pallets.
