Abstract (en)
[origin: WO2004065867A1] The invention relates to the door (2) of a refrigerating appliance, said door comprising an outer wall (3) and an inner wall which are interconnected along longitudinal edges. A window (13) is cut out of an edge of at least the outer wall (3), in which at least one display element can be seen when the door (2) is closed. Said display element is mounted on an operating screen (17) which is fixed to a front upper edge of the body (1).
