Abstract (en)  
[origin: EP1593412A1] The snowboard has an upper protection layer (3) covering the inner structure of the board, where the inner structure has a core (5) and a support (10). A metallic plate (2) placed between the layer (3) and the structure is located at the level of a transparent zone (4) of the layer (3). The plate has a traversing recess (12), on its upper side, inside which the layer (3) and the support penetrate to form hollow zones.
