Abstract (en)  
[origin: EP1593611A1] The packaging has a sectile tamper resistance strip (13) comprising a protrusion zone cooperating with a face side (9) of a cover (3). The zone defines in cooperation with an edge (21) of a base (5), a slot parallel to the edge (21). The slot has a length approximately equal to the length of an elastic tab (12) arranged on a lower edge of the side and permits to introduce the tab in it while closing the packaging.
