Abstract (en)

[origin: EP1593644A2] The industrial truck has a piston and cylinder arrangement (20) comprising a cylinder (26) housing an extending and retracting piston (22) for driving components (12,14) of a lift frame (10). The piston is connected to one component (14) for force transmission, and the cylinder is supported on a bearing (30,34) of the respective other component (12) allocated to the cylinder and is connected to it for force transmission. The cylinder is in engagement with the cylinder bearing in such a way that it is movable relative to the cylinder bearing.
