Abstract (en)

[origin: EP1594108A1] Opposite an outer edge (8), an inner edge (4) fastens on a base plate (BP) (1). The shape of a covering plate (6) corresponds to the shape of a symbol/character or a symbol/character component and links to the outer edge of a side-wall (SW) (3) along its side edge. In the BP a groove (2) is milled so as to run round and extend downwards. SW edge beading (5) presses into the groove. An independent claim is also included for a method for producing a display device according to the present invention.
