Abstract (en)  
[origin: EP1594109A1] The device has supports, each designed as a long elongated profile body and having a recess extending in the longitudinal direction of the body. Light emitting diode groups (27) are mounted at respective circuit boards (24) that are integrated into a protective body. The boards are inserted into the recesses such that the groups partly protrude out of the recesses or turned to an exterior of the respective support.
