Abstract (en)  
[origin: WO2004072873A1] A pari-mutuel system, and more particularly, a pari-mutuel system relating to a real time virtual horse racing game wherein the outcome of such race is determined by a random number generator such that each competitor of the race has a statistically equal chance of winning. Players make wagers on a specific wager type wherein each wager type is associated with a pool. A predetermined portion of all wagers made is retained by the house and another predetermined portion of wagers made for specific wager types is redistributed to into a pool and wherein the odds of winning are lowest in comparison to the other pools.
