Abstract (en)

[origin: EP1466535A1] Process for combining tobacco product components comprises feeding products of a first and second group with cigarette mouthpiece cigarette groups to a covering device (10.1, 10.2) and providing the products with a connecting sheet. The products of the first and second group are transported to a common rolling device (27) and are surrounded by the connecting sheet in the rolling device. Independent claims are also included for: (1) machine used in the tobacco-processing industry, especially a filter-attaching machine; (2) multifunction drum for products of the tobacco-processing industry; and (3) conveying drum (22, 25) for products of the tobacco-processing industry.
