Abstract (en)

Mould container for manufacturing green bricks from clay for the brick manufacturing industry, comprising: a number of mould containers combined to form a unit, wherein each mould container defines a number of upright walls and is provided with a bottom movable between the walls, an ejector coupled to the movable bottom for releasing the green brick from the mould container by displacing the movable bottom; wherein the movable bottom of a mould container takes a smaller form than the area defined by the walls of the mould container for the purpose of providing intermediate space between the peripheral edge of the movable bottom and the inner side of at least one of said upright walls. <IMAGE>
