Abstract (en)
A food pack comprising a multiplicity of individual food items is formed of a sheet material and has a base (2) and a circumferential wall (3,4) extending upwardly from the base. The wall comprises a pleat (14) extending upwardly from said base (2) and having at least first and second pleat layers, wherein the pleat comprises a first pleat length (15) in which at least first and second layers of said pleat are sealed together and a second pleat length (16) in which said first and second layers of said pleat are not sealed together or are sealed together in a manner such that they are more easily unsealed than in said first pleat length. The pack can be made using a form-fill method. When opened, the pack has an upper access opening which is of greater cross-section than a lower region of the pack. <IMAGE>
