Abstract (en)
[origin: US2005257445A1] The invention provides a device for attaching and lifting concrete parts, in particular reinforced concrete prefabricated elements, having a storage box and at least one flexible rope element which penetrates the storage box and has a rope loop and an end anchor, with the rope loop being at least partially accommodatable in the storage box and releasable therefrom, characterised in that at least one of the rope loop and the end anchor of the at least one flexible rope element assumes, at least in sections, an angle of between 0 and 45° to the bottom of the storage box.
