Abstract (en)

[origin: EP1596021A2] Shell or wall element (1) comprises a layer (2) containing clay and/or loam joined to a further layer (3) via holding elements (4). Preferred Features: A hollow chamber (12) is formed between the layers. A heat insulating layer, preferably a hard foam layer, is arranged on at least one side of the wall element. The layer containing clay and/or loam is part of several layers forming a layer composite. The layers are adhered together.
