Abstract (en)

The device has a connection part with a plate (6) parallel to a rail of a support. The plate has locking units (7) at its two ends for housing a determined number of terminal blocks, plated against each other in a row, between the two ends. The units have shims (8) cooperating with a wall of a junction block that is placed at an end of the row. Hooks (13) permit to fix the device with the blocks placed at the ends of the row.

Abstract (fr)

Dispositif (2) de maintien en position de blocs de jonction (3) fixés par un pied (4) sur un support (5) de type rail, notamment pour former un bornier, caractérisé en ce qu'il comprend une partie de liaison (6) munie de moyens de blocage (7) à ses deux extrémités permettant de loger entre ces deux extrémités un nombre déterminé de blocs de jonction (3) plaqués les uns contre les autres en une rangée. <IMAGE>
