Abstract (en)

[origin: WO2004075631A1] The invention concerns a string for agricultural use comprising at least one cord (11) and a stop element (14), wherein said cord (11) is folded according to a configuration such that it forms ends (13) and at least one ring (12) and said stop element (14) is provided with at least one orifice (15) through which said ends (13) can slide to adjust the width of the ring for tying up the plants. The inventive strings are of different thickness and length according to their use.
