Abstract (en)

[origin: US2006102034A1] A washing apparatus for printing and/or coating mechanisms in a processing machine is provided. The washing apparatus permits a stable disposal of soiled cleaning fluid and noticeably reducing the disposal expense in at least one printing/coating mechanism. To that end, between at least one washing apparatus 7.1, 7.2, 7.3 and a return line feeding into a holding container, there is a piston pump on the line side coupled to a machine controller.
