Abstract (en)
[origin: WO2004076330A1] The invention relates to a pedestrian conveyor containing a framework provided for accommodating palettes. The palettes have guide rollers and can be moved in the direction of conveyance by drive means. Each side of every palette is provided with an individual guide roller and, when viewed in the direction of conveyance, the rear area of each palette is supported on a front area of a following palette while forming a supporting area.
