Abstract (en)
[origin: WO2004072379A1] The invention relates to a utility vehicle (3) for machining rails (11) which can be jointly used with a roadborne or railborne transport vehicle (1). The inventive utility vehicle comprises the following features: A supply line (18) having a releasable coupling (17) for connection to the transport vehicle (1) is provided for supplying the hydraulic drives (22, 35) with power. An engine frame (27) of the utility vehicle (3) can be connected to the transport vehicle (1) by means of a coupling (14).
