Abstract (en)  
[origin: WO2004077373A1] The invention relates to a security label (1) for protecting objects against theft, comprising an electronically detectable security element (4) which is arranged between a carrier layer (2) and a cover layer (3). The security label (1) can be fixed to the object which is to be protected against theft with the aid of a loop which can be made from a strip-shaped extension (6) of the carrier and cover layers (2, 3). The carrier and cover layers (2, 3) are made of a textile material, preferably Jacquard-fabric, which is made at least partially of polyester. The security label (1) has a simple structure and is particularly suitable for securing small, light objects, such as handbags, sunglasses or similar.
