Abstract (en)
[origin: EP1598475A2] The invention concerns a fabric with insect repellent properties and a method for the manufacturing of a similar fabric in which a solution comprising an insect repellent product and a binding agent on a fabric is provided whereby in the solution an acrylate and a elastomer are added in order to enhance the retention of the insect repellent product on the fabric. Hereby, a fabric is produced that retains its insect repellent properties during successive washes.
