Abstract (en)

The strip has a L shaped connector (15) with a backrest (20) and a rack (21) having teeth (22). A spring (16) has a section (34) connected between two sections (30, 32). A side of the section (30) opposite to the section (34) is to be placed against a side of the rack while a tooth passes across a window between the sections (30, 32), where an edge (35) of the window is situated opposite to a distal end of the section (32). An independent claim is also included for a distribution block comprising a connection strip.

Abstract (fr)

La barrette comporte une réglette (15) en matière conductrice comportant un dossier (20) et un râtelier (21) présentant une pluralité de dents (22) et comporte, pour chaque dent, un ressort (16) en σ formant, avec la dent (22) associée, une borne à connexion rapide. Le répartiteur comporte au moins une telle barrette (4) s'étendant entre deux flasques. <IMAGE>
