Abstract (en)

[origin: WO2004075663A1] The present invention relates to the use of a derivative of a amino acid and a diacid as a flavoring ingredient wherein one of the carboxylic groups of the diacid is bound to the alpha-amino group of the amino acid to form an amide bond. In particular said compounds are particularly useful as mouthfeel and/or umami agent and/or as monosodium glutamate (MSG) partial or total replacer.
