## Abstract (en)

[origin: WO2004069207A2] The present invention relates to complexes and fusion proteins comprising a CD91 ligand and an antigenic molecule, for use in the treatment or prevention of a disease. The invention specifically provides complexes comprising a CD91 ligand noncovalently bound to, or alternatively crosslinked to, an antigenic molecule. The invention also specifically provides fusion proteins comprising a CD91 ligand fused via a peptide bond to an antigenic molecule.
