Abstract (en)
[origin: WO2004078394A1] A deburrer comprises a deburrer blade (19) accommodated in a tool-holder (16) which is, in turn, accommodated in a handle (12). The tool-holder (16) has a connection profile of the type of a screwdriver bit and can be plugged into the handle (12) or handle shaft (13). The deburrer blade (19) can be rotated in the bit and optionally exchanged and may have a crank-like design, for example. It is also possible to use deburrer blades made of a ceramic material and held in the bit.
