Abstract (en)
[origin: FR2851240A1] The truck has a gripper (4) mounted on frame (11) of the truck to grab and divide tire group into two vertical sections. The group is divided to open a space between two sections of the group. The space is handled at high ground such that field of view of a driver of the truck passes across the space. The driver sees the ground before the truck, arranged equally of remote vision, at a distance of security. An independent claim is also included for a process of transport of divisible group of tires, particularly vertical pile of tires or pallet of tires on a truck.
