Abstract (en)

[origin: WO2004059408A1] The invention relates to a method and device for assisting a driver of a vehicle during a parking manoeuvre. A parking situation image is displayed for the driver on an image display device, in which a plan view of the parking gap (7) is presented with an optimal desired position (4), a desired course (5) and a first (1) and second (2) vehicle. The optimal desired position (4) corresponds to a position for the vehicle to adopt in the parking gap (7), the first vehicle (1) corresponds to the current vehicle position and the second vehicle (2) corresponds to the vehicle in a foreseeable target position which may be varied with the steering angle.
