Abstract (en)
A heel has a body (10), a circuit board (14), multiple illuminating elements (142), an integrated circuit unit (146), a power source (144), a switch (148), a push button (149) and a cover (18). The body (10) is permeable to light and has a recess (12). The circuit board (14) is received in the recess (12). The illuminating elements (142) are mounted on the circuit board (14). The integrated circuit unit (146) is electrically connected to the illuminating elements (142). The power source (144) is electrically connected to the illuminating elements (142) through the integrated circuit unit (146). The switch (148) is electrically connected between the power source (144) and the integrated circuit unit (146). The cover (18) is attached to the body (10) and has a bore (182) for the push button (149) extending out from the bore (182).
