Abstract (en)

[origin: EP1600292A2] The device (14) has a clamping drive that acts over the length of the sleeve (11) and that is centrally operated from one end of a tool cylinder (12) and/or machine. The clamping drive has a drive element (24) and several clamping elements operated by the drive element. The clamping device is a component that can be removed from the tool cylinder and tool sleeve when not clamped.
