Abstract (en)

[origin: EP1600387A2] A cardboard container particularly for solid, granular, powder or even fluids products is described, having a substantially box-shaped body open at the top and an upper closing wall (8) which disposes inside the body of the container at a certain distance from the upper edge (3) thereof and a pre-cut line (22-23), designed to facilitate the detachment of a disk (8') to form an opening for access to the container is provided; the body and the upper closing wall and possibly a movable flap, which acts as a lid once the disk has been removed, are formed from a single blank (100).
