Abstract (en)
The sack (1) has a multilayer overlap region with inner and outer plastic layers, at least one venting device (10) with at least one first venting opening (11) in the inner plastic layer of the overlap region (5) and at least one second venting opening (12) in the outer plastic layer of the overlap region, whereby the first and second venting openings are not aligned. When filled the sack can be stacked so that the first opening(s) is higher than the second opening(s), whereby a venting channel is formed between the openings in the overlap region.
