Abstract (en)

[origin: EP1600694A2] Device for adjusting and displaying time functions comprises an oven region and a hob region with operating elements (3-8) for adjusting and displaying at least one time function, and a display unit (2) for displaying the adjusted time function. An independent claim is also included for process for adjusting and displaying time functions using the above device. Preferred Features: The time functions are time, process duration, operation duration and time program. One operating region comprises a hob, a cooking zone or cooking plate of a hob and an oven region, especially a heating element and/or heating arrangement.
