Abstract (en)

Contact system includes fixed and movable contact for electric connection to fixed contact. Movable contact is held by contact holder (10), to which is coupled spring element (11) of electrically non-conductive material. Preferably spring element is of thermoplastics or elastomer. On functional sides of spring element may be included functional member for securing on contact holder. Spring element may contain fitting member, e.g. bore, for fitting pin, etc.

Abstract (de)

Die Erfindung betrifft ein Kontaktsystem. Aufgabe der Erfindung ist es, ein Kontaktsystem bereitzustellen, das einen vergleichsweise geringen Bauraum benötigt. Dies wird dadurch erzielt, dass das den Kontakthalter beaufschlagende Federelement aus einem elektrisch nicht leitenden Werkstoff gefertigt ist. <IMAGE>
