Abstract (en)
[origin: EP1601046A1] Antenna housing with a wall (11) made from composite material, a connection region and various carrier elements, An RF or HF suitable foam core, a thin, hard RF or HF suitable radar nose (12) connected to the wall connection region as a cover, which, together with wall for the foam and the antenna elements (a) and (b) below forms the housing:(a) at least one radiation element (14), (b) at least one switching plate (13) for controlling the radiation element. An INDEPENDENT CLAIM is included for an antenna with a housing as described above.
