Abstract (en)

[origin: WO2004074110A1] An automatic machine for sticking labels onto containers (15), said machine comprising a rotating conveyor (10) with slats (11) which sends the containers (15) to two lower stations at which the labelling process is performed at the appropriate time and in the suitable positions, so that the label can be correctly stuck onto the surface of the container (15) and onto predetermined areas of said container. Compared with conventional apparatus, the machine of the invention also provides better output.
