Abstract (en)
[origin: EP1602592A2] A plastic moulded vending pack has a deep tray (1) to hold the products and covered with a moulded lid (2) with raised edges to seal with a clip action onto the rim of the tray. The lid can thus be used for a number of times to access the contents. A flat foil (3) is applied onto the top of the lid to form a flat surface for applying the product/vending information. This can be applied as direct printing or via a separate label. The space between the foil cover and the lid can be evacuated, to form a thermally insulated cover, or can be filled with a second product.
