Abstract (en)

[origin: WO2004082641A1] The invention relates to an emollient mixture which is especially suitable as a mineral oil substitute in cosmetic compositions. Said emollient mixture comprises at least one ester selected from the esters of a C8-18 fatty acid containing a C3-12 alcohol and the esters of an adipic acid containing a C3-12 alcohol, combined with a polyalphaolefin. The proportion of the ester amounts to between 10 and 90 wt. % in relation to the total quantity of the ester and the polyalphaolefin.
