Abstract (en)

[origin: WO2004073760A1] The invention relates generally to a coating composition for a polymeric surface, methods for coating a polymeric surface, methods for preparing coated medical devices, polymeric surfaces coated with the coating composition, and medical devices comprising the coating composition. In particular, a coating composition for association with a polymeric surface, preferably a polymeric surface of a medical device, is described comprising a cross-linked basecoat displaying a plurality of active groups in association with a serpin or serpin derivatives, wherein the serpin or serpin derivatives are not substantially cross-linked with other serpin or serpin derivatives.
