Abstract (en)
[origin: WO2004078810A2] The invention relates to polymer products that can be obtained by mixing (A) polymers, obtained by the radical polymerisation of (A-1) ethylenically unsaturated monomers in the presence of (A-2) unsaturated polyalkylene glycols, with (B) silicones, at a temperature greater than or equal to 30 DEG C. The invention also relates to a method for producing said polymer products, in addition to their use in cosmetic preparations, in particular haircare preparations.
