Abstract (en)  
[origin: WO2004083355A1] A textile treatment agent, a laundry treatment agent or aftertreatment agent, and a detergent are capable of imparting skin-healing and/or skin-protecting substances via a textile treated therewith to the skin when a textile of this type is placed in contact with the skin whereby resulting in diverse advantages for the skin that go far beyond cosmetic or purely sensory aspects. The invention also relates to the use of the textile treatment agent or laundry treatment agent or aftertreatment agent within the scope of a washing or textile drying method or textile treatment method, and to a conditioning substrate and a conditioning method involving the use of the conditioning substrate in a textile drying process.
