Abstract (en)
[origin: WO2004079137A2] The invention relates to a motor vehicle comprising at least one cover (1), such as a door, lid or similar and an opening device. The opening device unlocks the cover (1) and opens the latter at least partially. According to the invention the cover (1) is configured without a handle and comprises an emergency opening device (4, 26, 27) that can be actuated when the cover is unlocked in order to manually open said cover if the opening operation becomes jammed. In addition to the opening device, the cover (1) can comprise an interrogation unit (22, 23, 24), which verifies the authorisation of a user, said unit releasing the opening device to open the cover (1) when a positive verification is made.
