Abstract (en)  
[origin: FR2851996A1] The device has a compressed air distribution unit (13) with an inlet (14) connected to an outlet of a pressure regulator (47) and an outlet (16) connected to a compressed air inlet (22) of an air amplifying transvector (3). An outlet (17) is opened when a connection unit is connected to it for connecting to an inlet (14) of a distribution unit (13) of a light material projection device. The outlet (17) is blocked by a ball forming valve when no connection unit is connected to the outlet.
