Abstract (en)
[origin: WO2004084201A1] An information storage medium in which a revision number has been recorded, and a method of recording and/or reproducing data thereon. In the information storage medium, a standard version number and a revision number distinguished from the standard version number are recorded in a reproduction-only area. According to the method, data is recorded and/or reproduced in the information storage medium which includes a lead-in area, a user data area, and a lead-out area. In the method, first, a standard version number is recorded in the reproduction-only area of at least one of the lead-in and lead-out areas. Next, a revision number distinguished from the standard version number is recorded in the reproduction-only area. Thereafter, the standard version number and the revision number are read and records and/or reproduces data according to a standard associated with the standard version number and the revision number.
