Abstract (en)
[origin: DE10310295A1] The security element (1) has an approximately annular body (2',2'',2''') provided with at least one hinge and a closure element (7) at spaced points around its periphery, fitted to the body (3) of the cable harness plug (4) at the lead cable plug-in end, before movement into an end position in which an annular bead around the outside of the security element is engaged by a locking clip of the cable harness plug.
