Abstract (en)

The variable fixable hinge has a fixing around two hinge axis (8) with a side fitting (1,2), where a fixing is interspersed. The hinge axis is clamped in a free position. The hinge axis is formed by a one-piece pin (3). The pin has three sections (3a, 3b, 3c) with have three different diameters. The pin is tapered in the form of steps, so that final section (3a) is the largest, the other final section (3c) the smallest and the intermediate central section (3b) has an intermediate diameter. The pin has an external thread (3d), which is where the thread has an internal thread is brought to an interference, which is arranged preferably in one of the two fittings. The external thread lies in the central section.

Abstract (de)

Variabel fixierbares Scharnier mit zwei um eine Scharnierachse (8) Verschwenkbahnen Beschlagteilen (1,2), wobei die Scharnierachse eine Fixierrolle (4) durchsetzt, welche von der Scharnierachse in einer frei wählbaren Stellung festklemmbar ist, dadurch gekennzeichnet, dass die Scharnierachse von einem einteiligen Bolzen (3) gebildet ist. <IMAGE>
