Abstract (en)

[origin: EP1605474A2] A cable (1) with at least two insulated conductors (2) in the same sheath (3) and with each conductor (2) comprising a conducting element (4) inside an insulating element (5), in which each conductor (2) is also covered with a skin (6) which is bonded to the insulating element (5) and is anti-adherent towards the sheath (3). An independent claim is also included for a method for the production of (1) by extruding the insulator (5) around each conductor (4) to make the insulated conductors (2), extruding a skin (6) around each insulated conductor (2) and then extruding a sheath (3) around the bundle of insulated conductors (2).
