Abstract (en)

[origin: WO2004084697A1] The invention relates to a device for dispensing at least one water-soluble active substance onto a cleaning brush, in particular for cleaning the lavatory. Said device comprises a receptacle, which contains the active substance and which can be detachably fixed to the brush handle of the cleaning brush by a fixing element. The aim of the invention is to improve said device to simplify its handling and to obtain the most precise dosage possible for the dispensed product. To achieve this, the receptacle for the active substance is configured as a product container (1) that is sealed when in use and that comprises a plurality of first cavities (3) on its upper face and a plurality of second cavities on its underside (5).
