Abstract (en)
[origin: WO2004081113A1] The invention relates to a supporting structure (1) for a shedding system in a mechanical weaving loom. Said supporting structure is provided with a housing consisting of a first partial housing (10) that can be applied to the machine frame of a mechanical weaving loom, in the region of the outer side of a lateral part (12) thereof, and a second partial housing (24) that extends perpendicularly to the lateral parts (12, 13) of the machine frame (11) of the mechanical weaving loom, over the width (A).
