Abstract (en)  
[origin: DE10310855A1] To produce a wire cable, with a core cable (1) or strand, when the outer wire layers (5) have been laid their strands (6) are hammered to smooth the outer surface and/or increase their filling factor. Before the outer wire strands are twisted into place, an intermediate layer (4) of thermoplastic material is applied around the core, and the outer wire layers are pressed into the plastics as they are twisted into place. The core has a core strand (2) with wire strands (3).
