Abstract (en)

A packing box includes a box main body; and an inner plate on which a packing object is fixed by at least a holding band. The inner plate is accommodated in the box main body and is kept in a horizontal direction. The inner plate may include a main plate on which the packing object is fixed, a set of first plates which bendably extend from each of first ends of the main plate opposing to each other, and a set of second plates which bendably extend from each of second ends of the main plate opposing to each other. The packing object is desirably fixed at a center of the main plate such that the packing object is not contact with inner walls of the box main body. <IMAGE>
